Welcome to Ma'roulette!

Be careful! You will not become rich by applying my method, I will not make you believe that playing roulette is a safe way to earn big money... No, I will just explain how to earn a lovely amount of cash *Enjoy* :)

[Here is the summary...](#)

Be careful to swindling

If it would be possible to win without fail at the roulette, no-one would talk about it!

Bad news, at roulette like for the other casino games, the only one to win on the long run is the casino. This is a mathematic explanation, at roulette game, thanks to the 0 square, the casino always won in the long-term.

The only way to win at roulette is on the short-term, and if you know how.

By short-term, I do not mean quickly, because betting methods "Martingale" are long to perform. The trick is to stop at the right time.

You will then be able to make a profit of 150 to 300 dollars and stop. This will make a good gift offered by the casino ;)

I offer you to visit my website in order to understand the method and do not get swindled by the casino.

[Let's start the explanations](#)

Lets put all the theory into practice and start earning money:

First of all, there is no genuine winning roulette system to make profit on every bet. None. But following my advises, you will be able, like me, to win 200 to 300 dollars.

Please have a look to the section "understand" of my website before applying my method. Indeed, it is not as easy as some pretend to make profits at roulette. The best is to read my entire website...

The first step to my method is to open an account on an online casino.

This is the hard step to psychologically do. You have to choose a casino you can trust (refer to [this list](#) this list). Then, you register, download the program and transfer some real money on the casino account. This amount of money will have to be adjusted corresponding to the maximal bet authorized (see [here](#)). I advise to transfer a minimum of 200 dollars .

Be careful NOT to subscribe to the bonus offer at the registration of the casino if it is conditioned to a minimum number of bet to perform (or minimum amount of money to bet).

Then you apply my method playing at roulette ([here](#) are the details):

(Starting bet D) < (Maximum authorized bet) / 32.

Summary table:

	Bet	Bet on	If won, immediate profit	If won, total profit
1st wager	D	Red	2D	D (=2D-D)
If lost,	2D	Black	4D	D (=4D-2D-D)
If lost,	4D	Red	8D	D (=8D-4D-2D-D)
If lost,	8D	Black	16D	D (=16D-8D-4D-2D-D)
If lost,	16D	Red	32D	D (=32D-16D-8D-4D-2D-D)
...	Profit = always initial bet value D.

D = initial bet value. For example 1\$.

It just takes patience and discipline and you will win with it, do only bet following my method. You have to regularly change the simple chances you bet with. You do not play other casino games. You prefer [French or English roulettes](#). You take your time and play on several day if required.

Finally, when your accumulated a couple of hundreds of dollars, **you stop.**

It really is important that you stop soon. **The casino always won on the long run.**

If you leave now, the casino lost. This loss is nothing for the casino but a fine amount of money for you.

Close your casino account and move on. Use this money to make joy around you, you will earn so much more.

Thanks for your visit.

Here is the list of casinos for which the method works

I have linked the 2 online casinos I won with.

I suggest 2 other ones for US players (also valid for non US residents).

770 Casino

This is where I began. Do not play the "bonus" roulette. You can do half a dollar bets in order to get used to my method. I have won hundreds of dollars there.

Casino Riva

Use the European Roulette (green) or the "easy roulette". The bets start at 1 Dollar which allows using my method. Be careful not to try other lovely scratching games as they look very cute. You are not here for that!

You can also use :

This list is a summary of on-line trusted casinos. As soon as I try my method with them, I update the list.

[Casino Bellini](#)

[Europa Casino](#)

[Titan Casino](#)

[Casino Del Rio](#)

Selection of on-line casinos for US players:

Due to legislation approved on October 2006 in US, I suggest the following approved list:

Rushmore Casino

Tested by a friend of mine. He won 320 Dollars in 2 weeks. Apparently it s a well-known north-American online casino. This trusted establishment has taken the necessary means to provide US players with convenient deposit and withdrawal options that will seamlessly process.

I would be very happy to have your feedback on the comment page.

Cherry Red Casino

Another online casino for US Players. With this casino, the roulette minimum bet is \$1 so it looks good to apply my method. Do not take the bonus cause if you do, you'll have to wager the bonus and the deposit amount 15 times before making any cash-outs.
